```
CC gene is located at chromosomal position 15q21.3. The kinase CC gene is located at chromosomal position 15q21.3. The kinase CC polypeptides are useful for diagnosing a disease or disorder CC selected from cancers (e.g. cancers of tissues and cancers of CC hematopoletic origin), immune-related diseases and disorders of CC cardiovascular disease, brain or neuronal-associated diseases (e.g. CC Alzheimer's disease, Parkinson's disease, multiple sclerosis), CC metabolic disorders, peripheral nervous system diseases, amyotrophic CC lateral sclerosis, viral infections, infections caused by prions, CC infections caused by bacteria, infections caused by fungi, ocular CC diseases, migraines, pain, sexual dysfunction, mood disorders, CC attention disorders, dyskinesias, and organ transplant rejection. CC psychotic disorders, dyskinesias, and organ transplant rejection. CC kinase inhibitors are useful for treating diseases and disorders constrained above.

The nucleic acid sequence can be used to screen libraries, isolate clones and prepare cloning and sequencing templates and as hybridisation probes for screening libraries, and as therapeutics such as antisense therapy and gene-therapy. Probes derived from the DNA or polypeptide sequences can be used in the identification, selection and validation of novel molecular targets for drug discovery.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  An

The nucleic acid sequence can be used to screen libraries, isolate clones and prepare cloning and sequencing templates and as hybridisation probes for screening libraries, and as therapeutics such as antisense-therapy and gene-therapy. Probes derived from the DNA or polypeptide sequences can be used in the identification, selection and validation of novel molecular targets for drug discovery.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Disclosure; Page 33;

CC corresponding cDNAs. A composition containing PKIN agonist is useful for treating a disease or condition associated with decreased expression of CC PKIN and a composition comprising PKIN antagonist is useful for treating CC a disease or condition associated with decreased expression of PKIN and a composition comprising PKIN antagonist is useful for treating CC adsease or condition associated with overexpression of PKIN. The CC disorders include cancer (leukaemia, adenocarcinoma, lymphoma, melanoma, CC myeloma, sarcoma, teratocarcinoma, Hodykin's disease); immune disorder CC autoimmune thyroiditis, gout, bronchitis, crohn's disease, diabetes catolumnune thyroiditis, gout, bronchitis, Crohn's disease, diabetes osteoarrthritis, osteoporosis, pancreatitis, psoriasis, Reiter's syndrome, CC atherial, parasitic, fungal, viral, protozoal and helminthic infections) CC growth and development disorders (arterioscal and helminthic infections) CC Cushing's syndrome, hypothyroidism, cerebral palsy, cataracts); cardio crascular disease (arteriovenous fistula, hypertension, vasculitis, CC aneurysms, congestive heart failure, angina pectoris, myocarditis, CC disorder (fatty liver, Fabry's disease, Niemann-Pick's disease, Cx toxicity of a test compound and in gene therapy. The present sequence is human PKIN-10 cDNA.

                                                                                                                                                                                                                                    The present sequence encodes human kinase 15977. The specification also describes kinases 2504 and 14760. The kinase polypeptides and polypucleotides are used to treat cellular proliferative or differentiative disorders, neural disorders, immune disorders and skeletal cardiovascular disorders, liver disorders, skin disorders and skeletal muscle disorders. They may also be used for controlling disorders associated with bone metabolism, cardiovascular disorders, viral diseases, pain or metabolic disorders, blood vessel disorders, and hepatic or liver disorders.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 밁
                                            This sequence encodes a protein kinase which is an HRR25-like correction. Host cells stably transformed with the protein kinase encoding DNA may be used for the expression of the protein kinase such that the expressed protein is "displayed" on the host cell such that the expressed protein is "displayed" on the host cell curface. The cells may also be used for the production of antibodies. The host cells may also be used for the large scale production of the protein kinase, the expressed protein being either classifier in the cell surface or from the culture medium. Recombinant HRR25 like proteins display a number of properties which are unique among the eukaryotic protein kinases e.g. the HRR25 protein possesses both protein-tyrosine kinases e.g. the HRR25 operates to promote repair of DNA strand breaks at a specific nucleotide sequence and is the only protein kinase activities. Also, HRR25 operates to promote repair of DNA strand breaks at a specific nucleotide sequence

This human casein-kinase-I (CKI-gamma-1Hu) gene which is a homolog of a DNA recombination and repair gene called HRR25 (HO and/or radiation repair) possesses both protein-tyrosine-kinase and protein serine/tyrosine-kinase activities. HRR25 operates to promote repair of DNA strand breaks at a specific nucleotide sequence and is the only protein-kinase known to have such recombination/repair promoting activity. DNA encoding HRR25 can be used to isolate and identify related sequences, while recombinant HRR25, or cells expressing it, can be used to screen compounds for their effects
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                1206

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   망
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              δ
This sequence encodes a protein kinase which is an HRR25-like protein. Host cells stably transformed with the protein kinase encoding DNA may be used for the expression of the protein kinase such that the expressed protein is "displayed" on the host cell surface. The cells may then be used as immunogen for the production of antibodies. The host cells may also be used for the large scale production of the protein kinase, the expressed protein being either isolated from the cell surface or from the culture medium. Recombinant HRR25 like proteins display a number of properties which are unique among the eukaryotic protein kinases e.g. the HRR25
                                                                                                                                                                                                                                                                                                                               Wild-type and mutant protein kinase genes and encoded polypeptide(s) - Useful in screening for compositions effect DNA double strand break repair activity
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Ното
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               1206
